

Vision

- *The Presidential Guard exists to conduct special missions in support of UAE National Policies and Objectives. These missions are inherently complex, require Rapid Execution, are no-fail, and of the utmost Strategic Importance. The PG operates across the full Operational Spectrum, and is capable of fighting independently or integrated within a Joint or Multinational Force.*
- *To effectively address the changing operational environment, the nature of modern threats, and technological acceleration, the PG must undergo continuous development to remain a force capable of operational adaptation and achieving decisive results. Through the PG2030 initiative, we will forge a force structured to be **adaptive** by nature, **innovative** by design, backed by modern technology, and **constantly ready** to deliver Strategic and Operational success.*

PG 2030 Transformation Logic

How the 12 Force Design Concepts create warfighting capability and enable validation against the 21 SAG mission sets
