

INNOVATION COMMAND WORKING GROUP

What we're bringing, what changed, and what to raise · Tuesday 2026-08-18

DATE / TIME	STATUS	CHAIR	SBTDWS ROLE
Tue 2026-08-18, 08:00	Reschedule of the wk-of-08-11 meeting	CDD (J8) — confirmed lead	WG member, execution-lane offer

WHAT CHANGED SINCE THE LAST BRIEF

J3 decided **CDD (J8) leads** the combined Working Group, with all relevant parties feeding in. **MAKHLAB 1 (Falcons Bde) and the Innovation Command work now sit in the same WG but stay separate projects** — Falcons Bde becomes the framework/best-practice reference as other units stand up their own MAKHLAB serials (2/3/4/8), and lessons from the innovation piece are expected to feed into the wider innovation pipeline's foundation, not the other way round.

WHAT WE'RE BRINGING

- 01 TEIW STANDING CHARTER

The school's already-drafted answer to "how do we do tactical experimentation" — Tier 1/Tier 2 model, three-question entry criteria, defined outputs. Bring as running doctrine, not a new pitch.
- 02 ONE-PAGE BRIEF FOR CDD (V2)

Explains the tiers and the governance-option thinking that led to the current model. Hand over for CDD's use — take it or leave it, not a position we're asking them to adopt.

RECOMMENDATIONS TO MAKE

- 1 NAME CDD AS TEIW'S TIER 2 RECIPIENT

The charter currently routes Tier 2 to "when established" governance that didn't exist. It does now — propose CDD formally as the gate.
- 2 OFFER TEIW AS THE PG-WIDE TIER 1 TEMPLATE

Not just an SBTDWS tool — a working pattern (hypothesis, MOE, entry criteria) other units' experimentation could reuse.
- 3 TIE TEIW TO THE MULTI-DOMAIN TRAINING CENTER AT HAMEEM

WGS's desired end state (field trials, readiness assessment, warfare-methodology development) is functionally the same territory TEIW already covers. Propose co-locating the Experiment Cell there as WG5 stands up, rather than building the function twice.

QUESTIONS / FLAGS TO RAISE

FLAG · RECOMMEND

- FLAG

WG4 (this WG, CDD-led) and WG5 (Multi-Domain Battle Center, J7-led) both touch "Live Experiments" territory — ask directly whether WG4 governs the Tier 2 gate while WG5/TEIW own Tier 1 execution, before the lane split gets assumed rather than agreed.
- FLAG

Land explicitly that innovation needs to stay culturally separate from CDD's day-to-day CAPDEV/procurement business — worth saying even though CDD has already won the chair, not less relevant now.
- NOTE

Falcons Bde's "framework/best-practice reference" role for other units' MAKHLAB serials is a useful precedent to cite when offering TEIW as the PG-wide Tier 1 template — same pattern, different domain.

DECISIONS CONFIRMED AHEAD OF THE MEETING

ITEM	DECISION
WG Lead	CDD (J8) — confirmed by J3, week of 2026-08-11
MAKHLAB 1 / Innovation Cmd	Same Working Group, separate projects
Falcons Bde role	Framework / best-practice reference for other units' MAKHLAB build-out
Meeting	Rescheduled to Tue 2026-08-18 08:00 (quorum issue previously)

FOLLOW-UP

Share outcomes with Frank afterward — he coordinates across all PG 2030 working groups and flagged the WG4/WG5 cross-linkage as the right direction in his own review of the earlier framework.
