

How We Turn Ideas Into New Capabilities

PG Innovation & Experimentation — Simple Overview

THE PROCESS, STEP BY STEP

Where SBTDWS fits in: Step 2. We already run this step today — testing ideas quickly and safely before anyone spends real money on them. Step 3 (the decision) now sits with CDD.

WHO DOES WHAT

CDD	Leads this working group. Decides which tested ideas get funded and rolled out.
SBTDWS	Runs the tests (Step 2). Reports back clearly on what worked and what didn't.
FALCONS BRIGADE	Working on their own project (MAKHLAB 1). Sharing what they learn so other units don't start from zero.

WHAT SBTDWS IS OFFERING

- 1 A testing process that already works.**
We don't need to build this from scratch — SBTDWS already runs Step 2 today, with clear rules for what counts as a fair test.
- 2 A home for this work.**
As the new Multi-Domain Training Center is built at Hameem, this testing work can be based there — one place for training, trials, and new ideas, instead of building something separate.
